Hi John, We are working with SADIE to develop views and it appears as if it is not refreshing in the Region 06 SADIE widget. We have success and current view holdings available with your R08 widget but not with R06 Gold King Ops. Please advise.

I guess it is possible. Is QC Comment coming from a field in the scribe table or somewhere else? Adding column is easy if it is existing field. It is not difficult if you want it manually too.

Thanks John,

Too bad they went with Region 6 web viewer. The "view trend" is cool, but the "View Graph" is what takes us to SADIE and I am not sure that is as intuitive as the "View Analytical Results" you had in there before. Good Job
